FOR IMMEDIATE RELEASE

Tech Starts Here – SRCTec and District of Mission partner to launch campaign to attract and retain tech-focused business launches.

Mission, B.C. – The Sumas Regional Consortium for High Tech (SRCTec) and the District of Mission have partnered to launch a campaign targeted at tech entrepreneurs that communicates the benefits to launching and locating in Mission.

Bolstered by the successful venture accelerator program, a growing roster of successful tech entrepreneurs working in Mission, and co-location with Mission’s Economic Development Office, Tech Starts Here brings together the information and resources entrepreneurs need to know to realize the many benefits Mission has to offer.

Ideally located on major transportation routes, Mission offers easy access to the lower mainland and US markets and through SRCTec’s Raymond T. Szabada Technology Centre of Excellence and a BCIC funded technology venture accelerator it’s quickly becoming a hub for technology entrepreneurs.

Mission Economic Development Officer Stacey Crawford says, “We’ve been focused on the technology sector for a while, and this campaign is a big step forward. We’re proud to be partnered with SRCTec and we’re confident that technology business will be a game changer for Mission and the Fraser Valley.”

SRCTec chairman and interim CEO Raymon Szabada says, “XXXXXXXXXXXX.”

SRCTec and the District are working together to bring Tech Starts Here to entrepreneurs through major events, beginning with the #BCTechSummit in Vancouver.
